Acknowledgements

We would like to thank the following for their help in the preparation of this book. In particular, the staff of the Department of Oriental and African Studies at the University of London were invaluable in making the book possible, and the trickier grammar points were clarified by their help.

Thank you also to Helen Bugler at American University in Washington DC for her help in the preparation of the book, and to Helen Bugler and Isobell Bugler for their enthusiasm and help in the preparation of the book.

Introduction

What is Arabic 'grammar'?

Arabic 'grammar' will mean different things to different people.

To learners of Arabic as a foreign language it might mean the fundamentals of the language: whether there are genders, whether the noun or the adjective comes first, how the verb changes in the past and future, etc.

To more advanced Arabists and scholars it might mean the higher level subtleties of Modern Standard or Classical Arabic.

To native speakers, it usually conjures up a subject studied at school, often hazily remembered lessons analysing sentences with a view to being able to spell and pronounce formal Arabic correctly.

What this book means by 'grammar' is a progressive knowledge of the structure of Arabic from the basic building blocks to some, but by no means all, of the more subtle nuances of Modern Standard Arabic.

Levels of formality

Learners of Arabic generally appreciate the difference between the various spoken Arabic dialects and the universal Modern Standard Arabic. What is not so well understood is that Modern Standard itself can be spoken and written at different levels of sophistication.

Although most Arabs can communicate in a form of standard Arabic and are aware that formal Arabic is pronounced with additional case endings, only scholars, media presenters and public speakers use these endings routinely.

This book includes Case Notes sections with additional explanations and activities covering the grammatical case

endings used in formal grammatical cases as in German or Russian, pronounced in less formal contexts without reference to the formal endings. To acquire a more general understanding, study the Case Notes sections. This is an aspect of Arabic grammar for the beginning.

How to use this book

This is a reference and a learning book for intermediate students, to be used by themselves. The book is designed to improve understanding and to provide an overview of the structure of Arabic.

The book has a built-in self-learning system. The activities draw only on the material in the units. Work your way through the book progress step by step. As you progress through Arabic you can use the book to practice on a particular point of grammar.

The main part of the book is divided into units, concentrating on one particular feature:

- clear structural explanations
 - more than 100 structured grammar points
 - optional Case Notes (see above)
 - end-of-unit In Summary sections (see above)
- Answers to all the activities are given in the section of the book.

Arabic script

It is beneficial to acquire familiarity with the Arabic script and the short vowel marks before studying this book. However, the complete alphabet is provided here for reference.

<i>final</i>	<i>medial</i>	<i>initial</i>	<i>isolated</i>	<i>letter</i>
ا	ا	ا	ا	ألف alif
ب	ب	ب	ب	باء ba'

The Arabic root system

Arabic is a language based on a system of 'roots'. In English, we often refer to the 'root' of a word to mean its origin, for example the root of the English word 'engineer' is the Latin *ingenium*, meaning 'skill'.

The Arabic root, or *حَصْر* *ḥaṣr*, refers to the core meaning of a word. This core can usually be identified by three root consonants (non-vowels). For example, the sequence of three consonants *س/ف/ر* *s/f/r* (in this order, reading the Arabic script right to left) carries the meaning of 'travel'. A word which includes the sequence of letter *س/ف/ر* *s/f/r* is likely to have something to do with travelling. For example:

journey	سَفَرٌ <i>satar</i>
he travels	يَسَافِرُ <i>yusāfir</i>
ambassador	سَافِرٌ <i>safir</i>
traveller	مَسَافِرٌ <i>musāfir</i>
embassy	سَفَارَةٌ <i>sifāra</i>

All these words are derived from the root *س/ف/ر* *s/f/r*. Notice how the root letters always appear in the same order. Any additional consonants or vowels before, after or between the root letters modify the meaning according to different general patterns. The feminine ending *ة* (*tā' marbū'a*) is never part of the root and the most common additional consonants are *م* *m*, *س* *s* and *ت* *t*.

The emphasis on especially short vowel pronunciation often varies between written and spoken dialects. For example, *yaktub* is pronounced *yaktūb* in dialect. The emphasis is on the consonants rather than the vowels.

Much of Arabic grammar is manipulated to create new words. You will become more familiar with this as you be more able to identify the root of a word yourself.

Activity 1

Can you identify the root of the following sets of words? What do they all have in common?

- 1 bank
office
writer/clerk
library
- 2 lesson
teacher
study
school

3	broken	مكسور maksūr
	fragmentation	تكسير takṣīr
	it was broken	انكسر inkasara
	nut cracker:	كسارة kassara
4	player	لاعب lāʿib
	playing field	ملعب maʿlab
	toy	لعبة luʿba
	games	ألعاب alʿab

Words with doubled root letter

Some Arabic words have the same second and third root letters. When this is the case, they are sometimes written together with a shadda doubling sign (ّ) and sometimes separately, depending on the type of word:

جديد jadīd (new) = root letters ج/د/د j/d/d

كل kull (all) = root letters ك/ل/ل k/l/l

Words with four root letters

A few Arabic words have four root letters. Sometimes these are four different letters, for example ترجمة tarjama (translation), where the root letters are ت/ر/ج/م t/r/j/m, but often they are a repeated pair, for example زلزال zalzala (earthquake), where the root letters are ز/ل/ز/ل.

Words of foreign origin

Generally loan words such as راديو radyu (radio) or إنترنت intarnat (internet) fall outside the Arabic root system.

In summary

- Most Arabic consonants form the core meaning of a word.
- Vowels and shadda are used to create related words.
- The most common root letters are س and ت.
- Some words have more than three root consonants.
- Roots are the basis of the Arabic vocabulary.

Gender: masculine and feminine

In addition, there are feminine and don't fit in these categories. Most of the features or parts of the

Arabic nouns (words that name people, objects or ideas) are either *masculine* مذكر (mudhakkar) or *feminine* مؤنث (mu'annath).

chair (masculine)	كرسي korsi
table (feminine)	مائدة ma'ida

It is not difficult to tell the difference between masculine and feminine words. Feminine words usually fall into one of two categories:

1 Words with the feminine ending *sa* (ta' marbuta), for example:

car	سيارة sayyāra
bag	حقيبة ḥaqība
aunt (maternal)	خاله khāla
nurse (female)	ممرضة mumarriḍa

2 Words referring to female people but not ending in *sa*, for example:

girl	بنت bint
mother	أم umm

Activity 1

Decide if these words are masculine or feminine and tick the correct box.

- 1 كتاب kitāb
- 2 أخت ukht
- 3 بيت bayt
- 4 قميص qamiṣ
- 5 دجاجة dajaja
- 6 أب ab
- 7 ولد walad
- 8 العراق al-irāq
- 9 شارع shāriḥ
- 10 صورة ṣūra
- 11 عين ʿayn
- 12 اجتماع iṭimaʿ

Case Notes

Arabic has different levels of formality and complexity. In certain contexts, particularly Quranic or Classical Arabic, but also sometimes in more formal Standard Arabic, you will see and hear additional grammatical endings. These endings represent the *case* of the noun (*nominative, accusative or genitive*) and whether it is *definite or indefinite*. The endings change depending on the function of the noun in a sentence.

Isolated nouns are usually shown with the neutral **تنوين** (tanwīn) ending showing they are *indefinite* ('a/an'). **تنوين** (tanwīn) literally means 'putting a nun on' and for this reason is sometimes called *nunation*. It is written as a small symbol above the final letter (ـ) and pronounced *un*:

a boy	وَلَدٌ <i>waladun</i>
a girl	بِنْتٌ <i>bintun</i>

If a noun ends in ة (lā' marbūʿa), the *i* is pronounced before the **تنوين** (tanwīn):

a car	سَيَّارَةٌ <i>sayyaratun</i>
a nurse	مُمَرِّضَةٌ <i>mumarridatun</i>

تنوين (tanwīn) is not normally added to foreign loan words such as **كمبيوتر** *kumbyūtir* (computer).

Optional Activity

Put the **تنوين** (tanwīn) on these nouns and say them out loud.

1 صورة	1 قميص
2 سيارة	2 حاجة
3 عين	3 بيت

fn summary

- Arabic has b
- Most femini not, they ret
- Other nouns
- In more form additional g heard on Ara

ال al- (the)

Arabic has no separate word for 'a' or 'an', as in 'a chair' or 'an apple'. So كتاب (kitāb) means 'a book', مكتب (maktab) 'an office', etc.

To make a noun *definite* ('the book', 'the office', etc.), you need to add ال (al-) meaning 'the'. ال (al-) is written *joined* to the word it refers to and is the same for both masculine and feminine:

- ولد walad (a boy) → الولد al-walad (the boy)
- بنت bint (a girl) → البنت al-bint (the girl)
- قميص qamis (a shirt) → القميص al-qamis (the shirt)
- حقيبة ḥaqība (a bag) → الحقيبة al-ḥaqība (the bag)

Sun letters الحروف الشمسية and moon letters الحروف القمرية

Nouns starting with certain letters of the Arabic alphabet cause the pronunciation of ال (al-) to change. The 'l' is assimilated and instead the initial letter of the noun is pronounced twice – and written with a shadda (ّ) if the vowel marks are included:

- سيارة sayyara (a car) → السَّيَّارة as-sayyara (the car)
- نهر nahr (a river) → النَّهر an-nahr (the river)

ال al (the)

The letters which cause this change are called 'sun letters', الحروف الشمسية. ش (sh:n) is itself an exception: its pronunciation is unaffected and doesn't change. Hal...

The remainder of the lesson is about the 'moon letters' (al-ḥurūf al-qamriyya).

ظ ل ن
ي

Activity 1

Write these nouns with the definite article (al-), as in the examples.

(al-ka)
(as-sa)

قلم

3

بيت

4

صورة

5

ممرضة

6

تين

7

خيمة

8

الـممرضة
(the nurse)

Case Notes

When a noun is made definite (al-), the neutral (nominal) becomes a *damru* (in ā):

a boy ولدًا waladā

a car سيارةً sayyarah

Optional Activity

Put the definite new words from the list in the box for Activity 1 and say them.

المفتاح al-mufatāḥ

In summary

- الـ (al-) is the definite article. It is written joined to the noun (house); البيت
- There is no space between the article and the noun.
- Half the letter 'ayn' (ع) of 'al-' is written.
- The 'a' of 'al-' is written only when the noun ends in a vowel.

Elision

If الـ (al-) comes directly after a vowel, the 'a' of الـ (al-) will drop out, or elide, leaving just the 'l'. Again, this affects only the pronunciation and not the spelling:

البيت al-bayt
(the house)

في البيت fi l-bayt
(in the house)

Pronouns (singular) and non-verbal sentences

Pronouns are words such as 'I', 'it' or 'you' which replace names or nouns in a sentence.

Arabic has more pronouns than English since it has different versions for masculine and feminine, singular and plural, and even special *dual* pronouns for two people or things.

Singular pronouns

Here are the singular pronouns.

أنا	أنا	ana
أنت	أنت	anta
أنت	أنت	anti
هو	هو	huwa
هي	هي	hiya

Activity 1

Cover the pronouns above and then join the Arabic to the English, as in the example.

he, it (masculine)	أنت
I	أنا
she, it (feminine)	هو
you (masculine)	هي
you (feminine)	أنت

Non-verbal sentences

You can construct non-verbal sentences which do not require the equivalent of a verb. Here are some examples of non-verbal sentences:

أنا ياسين	I [am] Yasine
يوسف	Yousef [is a]
أختي	My aunt Na
الكلب	The dog [is]
أنت أم ياسين	You [are] Am

Activity 2

Fill in the gaps, as in the example.

أم سارة.

Activity 3

Write out these sentences again using **هو** or **هي**, as in the example.

- هو مدرس. 1 أحمد مُدرّس.
- 2 ياسمين ممرضة.
- 3 الكلب في الشارع.
- 4 السيارة في الشارع.
- 5 الولد في الحديقة.
- 6 البيت في السيارة.

**In summary**

- هو huwa m
- هي hiya m
- There are m
- أنت anta (m)
- There is no
- (verb 'to be
- Sentences c
- هو مدرس.

Case Notes

Look at these non-verbal sentences with the case endings included:

He's a teacher. هو مدرس huwa mudarrisun

You're a nurse. أنت ممرضة anti mumarridatan

The girl is in the house. البيت في البيت al-bintu fi bayti

All of the case endings in italics are neutral, or *nominative* – *-un* for indefinite and *-u* for definite – except البيت where the ending changes to *-i* after في *fi* (in). You will learn more about this in Unit 8. For the moment, it is enough to know that the case ending will be nominative unless there is a reason for it not to be.

Plurals and plural pronouns

Many aspects of elementary Arabic grammar are straightforward, but plurals require explanation and practice.

The first point to make is that Arabic plurals refer only to three or more people or items. For two people or items, there is a separate dual form, although this is not always used in less formal Arabic. The dual form is covered separately in Unit 13.

Plural pronouns

In addition to the singular pronouns, there are also five plural pronouns:

we	نَحْنُ nahnu
you (masculine plural)	أَنْتُمْ antum
you (feminine plural)	أَنْتُنَّ antunna
they (masculine)	هُم hum
they (feminine)	هُنَّ hunna

Although there are separate masculine and feminine plural forms of 'you' and 'they', the masculine is the most common. If a group of people is mixed male and female, the masculine form is used. The group must be entirely female for the feminine plural to be used. (Spoken dialects sometimes ignore even this difference and use the masculine form throughout.)

Plural nouns: int

Arabic nouns can be pluralised in two ways:

- By adding a suffix (the way English adds 's' to 'box' to produce 'boxes').
- By changing the internal structure (similar to the way English changes 'man' into 'men'). This is called *at-taksir* (التكسير).

However, whereas in English the broken plural is only used for a minority of plurals, in Arabic the simpler sound plural is used for the majority of plurals.

Sound plurals

There are two sound plural forms:

- sound masculine plural
- sound feminine plural

Sound masculine

The sound masculine plural is formed by adding *-in* (يُن) to the singular form. For example, *mudarris* (مُدَرِّس) (male teacher) becomes *mudarrisin* (مُدَرِّسِينَ).

The alternative *-in* (يُن) form, which will be explained later, is used for groups which will be explained with words describing females, for example *muḥāsib* (مُحَاسِب) (accountant) becomes *muḥāsibin* (مُحَاسِبِينَ).

muḥāsib (مُحَاسِب) (accountant) → *muḥāsibin* (مُحَاسِبِينَ)

ʿirāqī (عِرَاقِي) (Iraqi) → *ʿirāqīn* (عِرَاقِيَّين)

Note that not all words describing male people can be made plural using the SMP. Some use a broken plural (see Unit 11).

Activity 1

Complete these sentences using the plural of the words in the box, as in the example. (All of the words can be made plural using the sound masculine -īn ending.)

engineer	مُهَنْدِسٍ muhandis
carpenter	نَجَّارٍ najjār
baker	خَبَّازٍ khabbāz
Egyptian	مِصْرِيٍّ miṣriyy
French	فِرَانْسِيٍّ firaṁsiyy

هم مدرسون -

Sound feminine plural

The sound feminine plural (SFP) is formed by adding *-at* to the singular. If the singular word ends with the feminine *-a* (ة), this should be removed before the SFP is added:

جُنَيْهَة junayh (pound) → جُنَيْهَات junayhāt (pounds)

مُمَرِّضَة mumarriḍa (nurse) → مُمَرِّضَات mumarriḍāt (nurses)

سَيَّارَة sayyāra (car) → سَيَّارَات sayyārāt (cars)

Unlike the name 'sound feminine plural' suggests, this ending is *not* used exclusively to make feminine nouns plural. It is a common plural and is used with both feminine and masculine nouns, although not generally with nouns referring to male people. There are two main groups of nouns with which the SFP is used

SFP with all-female groups of people

The SFP is used for groups of three or more females

مُدَرِّسَة mudarrisa (female teacher) → مُدَرِّسَات mudarrisāt (female teachers)

عِراقِيَّة irāqiyya (female Iraqi) → عِراقِيَّات irāqiyyāt (female Iraqis)

Activity 2

Make these sentences feminine using the SFP, as in the example.

هَم مَدْرَسُون. هُنَّ مَدْرَسَات.

1 هَم مُحَاسِبُون.

2 نَحْنُ عِراقِيُون.

3 هَم فَرَنسِيُون.

4 أَنْتُمْ مِصرِيُون؟

5 لَآ، نَحْنُ كَويْتِيُون.

6 هَم مَهْنِسُون.

SFP with masculine nouns

The SFP is commonly used with masculine nouns referring to people

رُجَاة rujāja (the

اجْتِمَاع ijtimāʿ (the

حَيَوَان hayawān (the

لُغَة luḡha (language)

سَيَّارَة sayyara (car)

ثَلَاجَة thallāja (refrigerator)

Unfortunately there are some nouns which use the SFP even though your knowledge of the word may lead you to learn each word individually

In informal contexts you may hear words with the SFP

تَلِفُون tilitun (telephone)

كُمبِيُوتَر kumbyūtar (computer)

Non-human plurals

Plural pronouns such as *hum* (they) when referring to humans are *masculine* (they're teachers). With *hum* (they) referring to non-humans, the *feminine singular* pronoun *hiya* (she) is used (hiya fi l-ayna az zujajat? hiya fi l-ayna in the fridge).

This feature extends to *all* grammatical structures, such as verbs and adjectives (which will be covered in later units). The feminine singular is used with all non-human plurals whether the nouns are originally masculine or feminine in the singular.

Activity 3

Make sentences using هو huwa, هي hiya, هم ham or هن hunna, as in the example.

2

هي محاسبة.

5. أين القلم؟

4

3

7. أين السيارات؟

6. أين القطة؟

Case Notes

Plural nouns also have a case ending for the sound masculine singular nouns:

nurses

the nurses

However, the nominative case ending for both indefinite and definite plural nouns is:

teachers

the teachers

The sound masculine plural case ending being universally pronounced in all dialects.

Optional Activity

Make these words plural in the sound masculine case ending.

(male engineer)

(car)

(female teacher)

(meeting)

In summary

- There are two types of plural in Arabic, external 'sound' plurals and internal 'broken' plurals. There are no precise rules governing which plural is used for a particular noun.
- The sound masculine plural (SMP) is formed by adding *ون /ون* *un/-in* to the singular and is used with nouns referring to groups of people.
- The sound feminine plural (SFP) is formed by adding *ات* *āt* to the singular (after any *ة tā marbuta* has been removed). The SFP is used with groups of females and to make certain other masculine and feminine nouns plural.
- Arabic grammar treats any non-human plural as *feminine singular*. So you must use the feminine singular pronoun *هي hiya* with the plural of objects:

أين السيارات؟ هي في الشارع.

(Where are the cars? **They** are in the street.)

Demonstratives are the 'that', as in 'this house'. Arabic demonstratives describing a feminine

this (*masculine*)

this (*feminine*)

that (*masculine*)

that (*feminine*)

The demonstratives of *الـ (al)*:

هذا

this boy

هذه

this girl

ذلك

that house

تلك

that city

Notice how the *a* of *الـ* in a vowel (see Unit 3)

Activity 1

Fill in the gaps with the correct Arabic demonstrative to match the English, as in the example:

this man	الرجُل	هذا	1
this bag	الحَقِيبة		2
that newspaper	الجَرِيدة		3
that teacher	المُدْرَس		4
that nurse	المُمْرُضة		5
this pen	القَلَم		6
this river	النَهْر		7
that shirt	القَمِيص		8

If you want to say 'This is/are...' you use *huwa* (masculine) or *hiya* (feminine) with the demonstrative:

- ... This [is] the bag.
 ...
 ... That [is] the man.
 ...

Activity 2

Write sentences to match the pictures, paying special attention as to whether you mean 'this' or 'that'.

3

6

The demonstratives can also be used with an indefinite noun without *al* (a) to form a sentence:

This [is a] boy. هذا ولد. *hadha walad.*

That [is a] city. تلك مدينة. *tilka madīna.*

You need to be careful. As you already know, Arabic has no separate word for 'a/an' or direct equivalent of 'is/are'. This means that only the presence of *al* (a) indicates the difference between:

a) this book هذا الكتاب *hadha l-kitāb*

b) This [is a] book. هذا كتاب. *hadha kitab.*

Case Notes

If the case endings are added to demonstrative sentences, the ending will vary according to whether the noun is definite (with 'a') or indefinite:

This is a boy. هذا ولدٌ. hādha waladun.

This man is an engineer. هذا الرجلُ مهندسٌ.
hādha r-rajulu muhandisun.

That is a river. ذلك نهرٌ. dhālika nahrun.

Remember that if a noun ends in ة (tā marbūṭa), the tā becomes "united" before a case ending and is pronounced as a 't' (see Unit 2):

That girl is a nurse. تلك البنتُ ممرضةٌ.
tilka l-bintu mumarriḍatun.

This city is large. هذه المدينةُ كبيرةٌ.
hādhihi l-madīnata kabīratun.

Optional Activity

Put the case endings on these sentences:

1 هذا قلمٌ.

2 ذلك ولدٌ.

3 هذا الرجلُ خبّانٌ.

4 هذه مدرّسةٌ.

5 تلك الحقيبةُ كبيرةٌ.

Demonstratives v

Remember that Arabic has human plurals. Non-human plurals are the same as the feminine singular (see Unit 1).

So, for non-human plurals, the feminine singular demonstratives are used:

هذه الاجتماعاتُ. hādhihi al-ijmā'āt. These meetings.

هذه الزجاجاتُ. hādhihi al-zujājāt. These are bottles.

تلك السياراتُ. dhālika al-sayāراتُ. Those cars are old.

تلك الفواكهُ. dhālika al-fawākih. Those fruits are fresh.

تلك الفواكهُ. dhālika al-fawākih. Those fruits are fresh.

When talking about plurals of demonstratives:

هذه (الإنسان) هؤلاء. hādhihi (al-insān) hādhihā. these (human) plurals

تلك (الإنسان) أولئك. dhālika (al-insān) dhālik. those (human) plurals

هذه (المرأة) هؤلاء. hādhihi (al-mar'ā) hādhihā. these nurses

تلك (المرأة) أولئك. dhālika (al-mar'ā) dhālik. Those are the teachers

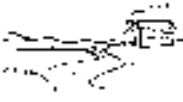

هذه (الشيء) هؤلاء. hādhihi (al-shay') hādhihā. these (non-human) plurals

تلك (الشيء) أولئك. dhālika (al-shay') dhālik. those (non-human) plurals

The plural demonstratives are used for human plurals. As a beginner, the plural demonstratives are not recognised.

Activity 3

Look at the pictures and decide if the sentences are true or false, as in the example:

	x	1 هذا قلم.
		2 هذه جريدة.
	-	3 هذا قميص.
		4 ذلك الرجل مدرس.
		5 هذه سيارات.
		6 هؤلاء مدرسون.
		7 ذلك بيت.
		8 أولئك ممرضات.

في summ

- Arabic demonstratives indicate whether the noun is singular, plural, masculine or feminine.
- The most common demonstratives are: *masculine singular* هذا hādha, *feminine singular* هذه hādhihi, *masculine plural* هؤلاء hā'ulā, and *feminine plural* هن hā'n.
- Plural demonstratives referring to females are used for both females and males.
- The meaning of the noun has the same effect on the demonstrative.

هذا الولد
هذه ابنة
هؤلاء
هن

Adjectives and descriptive sentences

- كسرت broken
- سعيد happy
- شهير famous
- متزوج married
- مناسب suitable

Descriptive words such as 'beautiful', 'new' or 'heavy' are known in English as *adjectives*.

A feature of Arabic adjectives is that many display common patterns. One of the most basic of these patterns is a fatha (a) after the first consonant and a long َ (ī) between the second and third consonants:

جميل	beautiful	jamil	جميل
قبيح	ugly	qabīḥ	قبيح
جديد	new	jadīd	جديد
قديم	old	qadīm	قديم
ثقيل	heavy	thaqīl	ثقيل
خفيف	light	khafīf	خفيف
كبير	big/large	kabīr	كبير
صغير	small	ṣaghīr	صغير
طويل	tall/long	ṭawīl	طويل
قصير	short	qaṣīr	قصير

Adjectives also often begin with *مـ* ma- or *مـ* mu- (the equivalent of the English past participle as in 'broken' or 'burnt' – see Unit 19):

Position and agreement

In English, adjectives describe: 'beautiful river' words are placed after other words, if the noun is made feminine, usually

- الأنهار الجميلة (a) beautiful river
- الفتيات الجميلات (a) beautiful girls
- المعلمة الجديدة (a) new teacher
- السيارة الجديدة (a) new car

These descriptive words are used in the above examples as the *predicative* of a *nominal sentence* or as the *predicative* of a *verbless sentence*, 'a-khabar', 'the news' that carries the information.

- النهر [is] جميل The river [is] beautiful
- السيارة [is] جديدة The car [is] new

Activity 1

Look at the list of adjectives on pages 34-5 and then fill in the gaps to match the pictures, as in the example. (There may be more than one possible answer.)

Adjectives with definite nouns

If an adjective is describing a definite noun with **الـ** al ('the') as in **البيت** al-bayt (the house), then the adjective must also have **الـ** al:

- the new teacher al-mudarris al-jadid المدرّس الجديد
- the beautiful picture aṣ-ṣūra al-jamīla الصورة الجميلة

When a noun has a plural (e.g. **البيوت** al-bayt) or is definite (e.g. **البيت** al-bayt), the adjective must also be plural or definite. In this case, the ad-

- درسة الكبيرة.
bayt al-jadid
My new house

More details on possessives

If there is more than one noun, the adjective, usually separated by **و** wa, must agree with the nouns.

- البيت الجديد الجميل
a large new school

- البيوت الجميلة
the beautiful old

You need to be very careful. If the adjective is definite (e.g. **هذه** hadha/hadhi) meaning, will be affected.

- البحر الجميل
a beautiful river

- البحر الجميل
the beautiful river

- البحر الجميل
The river is beautiful

- هذا هو البحر الجميل
This is a beautiful river

- هذا هو البحر الجميل
This river is beautiful
