About the Author

Dr. Dominik Hauser completed his PhD in physics at Heidelberg University, Germany. While working as a university professor, he started iOS development in his spare time. His first app on physics has been an astounding success worldwide. Since then, he's turned himself into a full-time iOS developer, crediting a number of successful apps to his name. He has been a Swift developer since day one and runs a blog on iOS development at <http://swiftandpainless.com/>.

I would like to thank my wife, Isa. Thank you for all your support over the years and, especially, in the last few months of writing this book. I also want to thank all the great people in our community. I learned so much by reading your excellent blog posts. I'm proud to be part of this community.

About the Reviewer

Ravi Shankar is a multiskilled software consultant with over 15 years of experience in the IT industry. He has the ability to work with different technologies and has extensive experience in product development, system maintenance, and support. Ravi is a polyglot and self-taught programmer, with hands-on experience in Swift, Objective-C, and Java. He believes in gaining knowledge through sharing and helping others learn about technology.

It was a pleasure to work with Nikhil, and thanks to Packt Publishing for giving me this opportunity.
